

FG 370 SBK Front Fork

The new FG370 Superbike Front Fork is an improved version based on last year FG270. FG 370 features an internal spring guide system that reduces internal friction and debris in the oil.

The setting is also improved. Fender bracket is now mounted on the fork bottom, which allows fast release system! The fork bottom is stronger and radial brake brackets are now mounted with 6 bolts instead of 5! Conventional brackets are also available!

Features:

- Total length of 730 mm
- Adjustable stroke 120-130 mm gives a broader range of use for different riders, bikes and tracks.
- External Rebound, Compression and Spring Pre-load Adjusters
- Caliper Bracket for radial type of brakes available
- No tools needed for adjustments of the external mounted Compression Adjuster
- Low friction oil seals and bushings
- New setting that results in improved performance
- New spring guide system, which gives less internal friction, less debris in oil and less maintenance
- Delivered with 9.5 N/mm Spring Assembled
- 9.0 N/mm and 10.0 N/mm optional Springs included in the Kit
- Option Springs are available from 8,0 N/mm to 10 N/mm, in steps of 0.5 N/mm.
- New fender mounting and the forks are prepared for fast-release
- Caliper Brackets have to be ordered separately, see other side for part numbers
- P/C 119 (without Caliper Brackets)
